DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 and 20-29, drawn to a clock generating apparatus, classified in class 327, subclass 291.
 - II. Claims 16-19, drawn to a signal detection apparatus, classified in class 327, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

Inventions of a clock generating apparatus and a signal detection apparatus are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the different limitations make the inventions I and II patentably distinct from one another, i.e., a reference that anticipates or makes obvious one of the inventions I or II would not, by itself, anticipate or makes obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separated status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Mr. Joe Stevenson on 9-17-01 to request an oral election to the above restriction requirement, but did not result in an election being made.
